# YASSIEN TAWFIK

BIOMEDICAL ENGINEER

#### +201096835548

- - n linkedin.com/in/yassien-tawfik
- github.com/YassienTawfikk

#### **PROFILE**

Biomedical Engineering student at Cairo University, engaged in hands-on projects on medical device calibration and digital health applications. Committed to leveraging technology for healthcare advancements. Seeking internship opportunities to apply my technical knowledge in practical, innovative healthcare settings.

#### **EDUCATION**

#### **CAIRO UNIVERSITY**

B.Sc. in Biomedical Engineering 2021 - Present

#### **PROJECTS**

#### **Oral Cancer Prediction**

 Microbiome-based cancer classifier using Random Forest, featuring SHAP explainability and optimized feature selection from TCMA dataset. <u>GitHub Link</u>

#### **Real-Time Patient Monitor**

• Live ECG monitoring tool with deep learning-based arrhythmia classification, intelligent alarm logic, and noise-resilient visualization. <u>GitHub Link</u>

#### Face Recognition with PCA

 Modular face detection and recognition system using Haar cascades and PCA-based embeddings, supporting RGB and grayscale datasets with ROCbased performance evaluation. <u>GitHub Link</u>

#### Advanced CV & Image Processing Toolkit

 Comprehensive suite of four standalone applications for edge detection, segmentation, image filtering, and feature matching—built with custom algorithm implementations. <u>GitHub Link</u>

#### **Automated Defibrillator System**

• ECG system detection of cardiac event GitHub Link

#### **CTG Heart Failure Monitoring System**

• Monitors and analyzes HRV and FHR signals to detect health abnormalities. <u>GitHub Link</u>

#### Digital Filter Designer

• using z-plane zero-pole placement with real-time frequency response visualization. <u>GitHub Link</u>

#### **Beamforming Simulator**

• Simulation for analysis in telecommunications and medical imaging. <u>GitHub Link</u>

#### **Dynamic Multi-Channel Signal Viewer**

• Desktop application for enhanced medical signal visualization and management. <u>GitHub Link</u>

#### **EXTI-Handler**

• Interrupt-driven embedded system on STM32F401XE. <u>GitHub Link</u>

## **Biomedical Engineering Trainee**

Baheya Foundation | 2024 - 90 Hours

• Gained comprehensive insights into clinical engineering and medical planning.

PROFESSIONAL EXPERIENCE

- Worked with medical devices across multiple departments, including pathology, sterilization, therapy, physiotherapy, and diagnostics. Developed skills in the hardware and electronic components of medical devices, focusing on their maintenance and calibration to ensure optimal performance.
- Attended sessions covering hospital systems beyond tumorfocused care, broadening my understanding of various healthcare environments.

#### TECHNICAL SKILLS

- Programming: C, C++, Java, Python
- Data Structures: Understanding of structures and their app
- Embedded Systems: Microcontroller interfacing and low-level driver development
- Biomedical Expertise: Biomedical device calibration
- **Digital Signal Processing:** Manipulating signals by digital techniques
- **Computer Vision:** Segmentation, feature extraction, and image enhance
- Machine Learning: Predictive modeling, neural networks, and classification techniques
- Data Analysis: Preprocessing, feature engineering, and statistical evaluation
- Bioinformatics: Microbiome profiling from sequencing data

**COMMUNITY ACTIVITIES** 

• Web Development: HTML, CSS, JavaScript

### CERTIFICATIONS

- Biomedical Training Baheya Foundation
- Medical Devices Calibration
- Frontend Web Development HTML, CSS, JS
